

Precision analysis

That's what is needed to help ME biomedical researchers in their quest for diagnostic tests and possible cures.

And that's why The ME Association has set up a **Post-Mortem & Tissue Bank Project** under the auspices of our Ramsay Research Fund to identify anomalies in the central nervous system that are unique to ME.

The aim is to have a tissue bank in a UK hospital facility that will be available to biomedical researchers.

If you would like to make a donation, please send cheques made out to **The MEA Ramsay Research Fund** to **ME Association, 7 Apollo Office Court, Radclive Road, Gawcott, Bucks MK18 4DF**. In your covering letter, be sure to tell us to spend it on the Tissue Bank project.
